

# WEATHER AND PLANT STATUS

HALLERTAU Week 18 – Week 20 April, 28<sup>th</sup> – May, 18<sup>th</sup> 2025

Current situation			
Growth	X behind		optimal
	ahead		
Disease pressure	high		low
Insect pressure	high		low
Weather trend upcoming week			
Temperature	X low		optimal
	high		
Precipitation	X low		optimal
	high		

**Comments**

Training was completed in the first week of May. Due to the cool nights, growth is somewhat behind. The entire spring is exceptionally dry and windy. Despite the drought, the soil is largely in good condition. According to current forecasts, rainfall is expected to start next week. Short-term occurrence of downy mildew primary infection in susceptible varieties was well contained. Currently, protruding shoots are being retrained and the rows are being plowed.

# WEATHER AND PLANT STATUS

TETTNANG Week 18 – Week 20 April, 28<sup>th</sup> – May, 18<sup>th</sup> 2025

Current situation			
Growth	X behind		optimal
	ahead		
Disease pressure	high		low
Insect pressure	high		low
Weather trend upcoming week			
Temperature	X low		optimal
	high		
Precipitation	X low		optimal
	high		

**Comments**

The weather in Tett nang was also sunny and very dry. The training has now been completed. Treatments against downy mildew and soil pests have been carried out. The rows are currently being plowed and soil cultivation carried out.

# WEATHER AND PLANT STATUS

ELBE SAALE Week 18 – Week 20 April, 28<sup>th</sup> – May, 18<sup>th</sup> 2025

Current situation			
Growth	X behind		optimal
	ahead		
Disease pressure	high		low
Insect pressure	high		low
Weather trend upcoming week			
Temperature	X low		optimal
	high		
Precipitation	X low		optimal
	high		

**Comments**

The Elbe-Saale region is also already experiencing drought. Cool temperatures are slowing down growth somewhat. Tillage work is being carried out. Training has been completed on most farms.
