

WEATHER AND PLANT STATUS

HALLERTAU Week 22 – Week 23 Mai, 27th – June, 7th 2026

Current situation			
Growth	X behind		optimal
	ahead		
Disease pressure	high		low
Insect pressure	high		low
Weather trend upcoming week			
Temperature	low		optimal
	high		
Precipitation	X low		optimal
	high		

Comments

Temperatures have recently returned to average levels. Overall, growth is slightly behind schedule. Fungal diseases are currently limited to isolated cases, while a low pressure of aphids has been observed. Defoliation has been completed.

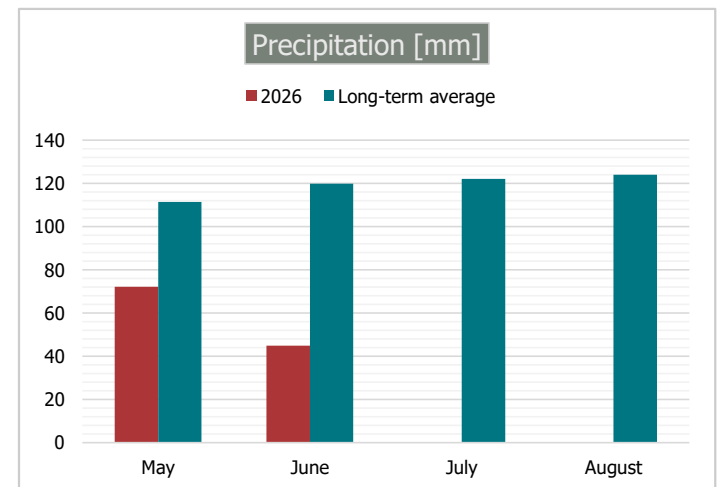

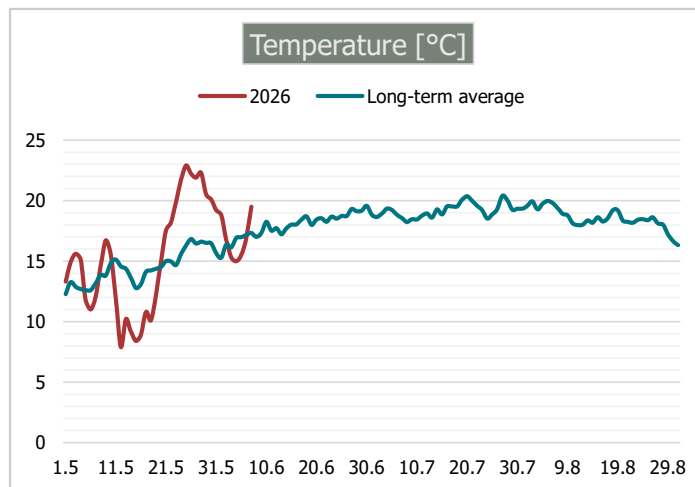

WEATHER AND PLANT STATUS

TETTANG Week 22 – Week 23 Mai, 27th – June, 7th 2026

Current situation			
Growth	X behind		optimal
	ahead		
Disease pressure	high		low
Insect pressure	high		low
Weather trend upcoming week			
Temperature	X low		optimal
	high		
Precipitation	low		optimal
	high		

Comments

Sufficient rainfall was recorded over two days in Tettang. Growth is a bit behind schedule. Measures to combat downy mildew and powdery mildew, as well as defoliation, were carried out.

WEATHER AND PLANT STATUS

ELBE SAALE Week 22 – Week 23 Mai, 27th – June, 7th 2026

Current situation			
Growth	X behind		optimal
	ahead		
Disease pressure	high		low
Insect pressure	high		low
Weather trend upcoming week			
Temperature	X low		optimal
	high		
Precipitation	low		optimal
	high		

Comments

Conditions were generally good in the Elbe-Saale region. Fields that were pruned on a later date are behind in growth. Downy mildew treatments and soil cultivation were carried out.
